

[Archibald First School](#)

The Kids-Hub is a coding club aimed at primary school children, reception and up. We follow lesson plans which form part of the National Curriculum, building different models each week, and then programming them with Scratch from the Ipad to move, make noise, add lights, music and more. The children are learning digital literacy, problem solving, critical thinking, social & emotional skills, supports multiple career pathways, promotes confidence, and much more. We operate from multiple locations across Newcastle. STEM Education has many benefits, and the children absolutely love it, all while learning through play. We also offer robotic/coding workshops during holidays, and birthday parties.
